

CLASS: DELIVERING YOUR NO-CODE PROJECT

This online, instructor-led class is designed for non-developers and delivers hands-on guidance for practitioners on the No-Code Lifecycle and building your first No-Code application.

No-Code development represents a significant advancement over the initial generation of Low-code tools, by opening up the potential for true non-developers (aka “Citizen Developers”) in the Business to build out their own apps without being dependent on IT or software development resources. However, as Enterprises are now rapidly adopting No-Code to address a wide range of demanding use cases, they are seeking support including proven and scalable guidance, training and strategic consulting services.

The [No-Code Playbook](#) was an important first step towards providing guidance for accelerating Enterprise No-Code adoption across the industry. It represents the only vendor-agnostic, practical guide that empowers Enterprise teams to deliver business apps with No-Code.

Now you can take this to the next level! Tachyon Solutions Founder/CEO Burley Kawasaki, and co-author of the No-Code Playbook, has developed this class “**Delivering Your No-code Project**” as part of a comprehensive Enterprise No-Code Training Series curriculum based on the concepts from the No-Code Playbook. This new series is **targeted at No-code Creators**, who typically sit within the business unit and possess a strong understanding of the business domain. They are responsible for the system configuration and quality activities using no-code capabilities.

CLASS OVERVIEW:

The class “**Delivering Your No-code Project**” presents foundational knowledge and hands-on exercises for No-code Creators based around expanded concepts from the No-Code Playbook.

- **Who:** No-code Creators, who typically sit within the business unit and possess a strong understanding of the business domain. Examples include, but not limited to, Business Analysts, Project Managers, and Business Operations personnel. They are responsible for the system configuration and quality activities using no-code capabilities.
- **When to Enroll:** [Enroll anytime](#) by selecting from regularly scheduled monthly classes.
- **Course Length:** 8 hours (2 days, 4 hours each)
- **Requirements:** 1-3 years recommended in project management or business analysis, but not required
- **Format:** Presented as a virtual live, instructor-based, facilitated training format; optionally can be bundled as part of a customized Corporate Delivery learning approach for your Enterprise as part of classes delivered for an integrated project/work team.
- **Approach:** Utilizes applied action learning following a proven "tell-show-do" model - explains concepts, demonstrates applications applicable to the enterprise, and allows learners to apply using interactive exercises.

TRAINING OUTCOMES:

Completion of the Enterprise No-Code Training Series will deliver a set of integrated learning outcomes for Learners:

- Introduction to No-code concepts and development principles;
- Understand the entire No-Code lifecycle, from start to finish;
- Understand the key differences between No-Code projects and traditional Agile/DevOps software development methods and architectures; and
- Surveyed best practices, tips and tools needed to be successful with No-Code; and
- Introduction to different No-code roles and organizational models for successful delivery.

CLASS AGENDA:

The course consists of a two-day, four-hour instructor-led modules:

Module	Overview
Day 1 (4 hours)	<p style="text-align: center;"><u>Introduction</u></p> <ol style="list-style-type: none"> 1. Intro 2. What is No-code? / No-code Principles 3. <u>Demo</u>: No-code in action 4. Roles & responsibilities 5. The No-Code Lifecycle – high level <p style="text-align: center;"><u>Design Phase</u></p> <ol style="list-style-type: none"> 6. Intro to Design Phase 7. Stage 1: Business Use Case 8. <u>Exercise</u>: Business Use Case 9. Break 10. Stage 2: Options Analysis 11. Stage 3: Design and Prototyping 12. <u>Exercise</u>: Prototyping the vision 13. Stage 4: Project Assignment 14. Wrapup / Q&A
Day 2 (4 hours)	<ol style="list-style-type: none"> 1. Intro & Recap <p style="text-align: center;"><u>Go-Live Phase</u></p> <ol style="list-style-type: none"> 2. Intro to Go-Live Phase 3. Stage 5: Prototype to MVP 4. <u>Exercise</u>: Kanban Method 5. Stage 6: Feedback Loop 6. Stage 7: Governance Checks 7. Stage 8: First Release 8. Break <p style="text-align: center;"><u>Everyday Delivery Phase</u></p> <ol style="list-style-type: none"> 9. Intro to Everyday Delivery Phase 10. Stage 9: Feedback Collection 11. Stage 10: Incremental Improvements 12. <u>Exercise</u>: Gathering & Prioritizing feedback 13. Stage 11: Everyday Delivery 14. Stage 12: Application Audit 15. Scaling No-Code with the Application Matrix 16. <u>Exercise</u>: Next 30 day plan 17. Wrapup / Q&A

ABOUT TACHYON SOLUTIONS:

Tachyon Solutions provides guidance, training and consulting that helps both Enterprises and Enterprise Startups leverage No-Code to accelerate growth by enabling new product innovation and digital transformation initiatives. We provide practical experience, tools and know-how from 40+ years of industry expertise and operational leadership honed from executive roles in product management and software development.

Our leadership brings a deep understanding and background from having worked in the low-code and no-code, workflow, process automation and cloud application platform markets across leading vendors. This allows you confidence that you are being guided down the path that will help you navigate your journey of planning and executing on your No-Code strategy and initiatives.
